

Use Case Diagram

Use Case Descriptions:

ID:	UC-01
Title:	Log in / Sign up for the account
Description:	1. Users create an account using their university credentials. 2. Users log in using their credentials.
Primary Actor:	Students
Preconditions:	1. For sign up the users must have valid university credentials. 2. To log in, the student must have an existing registered account.
Postconditions:	3. If signing up, a new account is created, and the student is directed to the app. 4. If logging in, the student is directed to the app.
Main Success Scenario:	Sign up: • Student clicks on the sign-up button. • System displays a registration form. • Student enters required details (e.g., name, credentials, email, etc) • System validates input. (e.g., checks if credentials are valid, etc) • If valid, the system creates the account and logs the student in. Login: • Student clicks on the Login button. • System displays a login form. • Students enter their credentials and password. • System verifies the credentials and password. • If valid, the system logs the student in.
Extensions:	• If any required field is missing, an error message is displayed. • If the credential is already registered during sign-up, the system prompts the student to log in. • If the password does not meet security requirements, an error is shown. • If login credentials are incorrect, an error message is displayed. • If email verification is required, the system sends a verification link.
Status:	Planned
Priority:	High

ID:	UC-02
Title:	Search for Events
Description:	Users can search for events by entering keywords or applying filters. The system displays a list of events that match the search criteria. Users can also view detailed information about each event and students can sign up as volunteers.
Primary Actor:	Students, Admin
Preconditions:	• The user (student or admin) must have access to the system. • The system must have a database of events (upcoming and past).
Postconditions:	• The system returns a list of events that match the criteria.
Main Success Scenario:	1. User navigates to the search bar. 2. The User enters search keywords or selects filters (e.g., event type, date) to refine their search. 3. The system displays the events that match the search criteria. 4. The student can view event details. 5. The student can sign up as a volunteer for an event. 6. Admin can manage and filter events (admin-specific features).
Extensions:	1. No events match the search criteria → System displays a “No events found” message. 2. Event details are unavailable → System displays a message. 3. Admin applies specific filters for event management → System shows filtered events based on the admin’s search criteria.
Includes:	View Event Details
Extends:	Filter Events, Sign up as Volunteer
Status:	Planned
Priority:	High

ID:	UC-03
Title:	Register for Events
Description:	Students register for free or pay for upcoming events.
Primary Actor:	Students
Preconditions:	1. The student must be logged in. 2. Event must be open for registration. 3. Event must not be at full capacity. 4. For a paid event, the student must have a valid payment method.
Postconditions:	1. The student is successfully registered for the event. 2. For a paid event, the payment is processed. 3. Confirmation is sent to the student. 4. If applicable, the student receives an entry pass or QR code.
Main Success Scenario:	• The student logs into the system. • The student browses / searches for an event. • The student selects an event to register for. • The system checks if slots are available. • If it's a free event, the student confirms registration. • If it's a paid event, the student is prompted to proceed with payment. • The student enters payment details or chooses to attach proof of payment. • Payment is verified and processed. • The system updates the participant list and sends confirmation.
Extensions:	• No events are available → System displays a message. • The event is full → System notifies the student and prevents registration. • The event requires payment → The student is redirected to the payment process. • Payment page fails to load → System displays an error and prompts retry. • Payment fails → System notifies the student and cancels registration (in case student decides to pay through the application) • Student cancels payment → Registration is not completed.
Extends to:	Cancel Event Registration
Status:	Planned
Priority:	High

ID:	UC-04
Title:	Viewing Volunteering Opportunities
Description:	A student views available volunteering opportunities for various events. They can see details such as the event name, date, location, and description of roles needed.
Primary Actor:	Students
Preconditions:	1. The student must be logged in. 2. Volunteering opportunities are available for events.
Postconditions:	The student has access to the list of volunteering opportunities.
Main Success Scenario:	• The student logs into the system. • The student navigates to the volunteering section. • The system displays a list of available volunteering opportunities. • The student views details about the opportunities (event details, roles, etc.).
Extensions:	• No volunteering opportunities are available → System displays a message.
Extends	• Registering for Volunteering (UC-05)
Status:	Planned
Priority:	Medium

ID:	UC-05
Title:	Registering for Volunteering (Extended use case of UC-04)
Description:	A student registers for a volunteering opportunity by selecting an available position and confirming their participation.
Primary Actor:	Students
Preconditions:	1. The student is logged into the system. 2. The student has viewed the volunteering opportunities. 3. The student selects a role they are interested in.
Postconditions:	1. The student is successfully registered for the volunteering position. 2. Confirmation of the registration is sent to the student.
Main Success Scenario:	• The student logs into the system. • The student views the list of available volunteering opportunities. • The students select a role to register for. • The student confirms registration. • The system updates the list of volunteers for that role and sends a confirmation.
Extensions:	• The role is no longer available → System notifies the student that the position has been filled. • Student cancels registration → System does not register the student.
Status:	Planned
Priority:	Medium

ID:	UC-06
Title:	Create New Event.
Description:	An event organizer(student) creates a new event by filling in event details, such as the name, date, description and event type. They can also include event prices (if paid), book a venue, and monitor event registration.
Primary Actor:	Event Organizers (Students)
Preconditions:	1. The event organizer must be logged into the system. 2. The event organizer must have the necessary permissions (e.g., from Admin, HUSG, etc.).
Postconditions:	1. The event is successfully created in the system. 2. The event details are stored, and the system starts tracking event registration.
Main Success Scenario:	• The event organizer logs into the system. • The organizer navigates to the "Create New Event" section. • The organizer enters event details (name, date, description, event type, etc.). • The system prompts the organizer to book a venue. • The organizer books a venue (included use case: Book Venue). • The organizer sets the event registration settings (included use case: Monitor Event Registration). • The system saves the event details and confirms creation.
Extensions:	• Venue is unavailable → System notifies the organizer and prompts to choose a different venue. • Registration settings cannot be saved → System notifies the organizer of an error.
Includes	• Book Venue (UC-07) • Monitor Event Registration (UC-08) • Edit Event Details (UC-10)
Extends	• Open Volunteer Sign-up Forms (UC-09)
Status:	Planned

Priority:	High

ID:	UC-07
Title:	Book Venue (Included use case of UC-06)
Description:	The event organizer books a venue for the event. The system checks venue availability and confirms booking.
Primary Actor:	Event Organizer (Students)
Preconditions:	• The event organizer must be logged into the system. • A list of available venues must be accessible.
Postconditions:	The venue is successfully booked and linked to the event.
Main Success Scenario:	• The event organizer selects a venue from the list. • The system checks the availability of the venue. • The venue is confirmed and booked for the event.
Extensions:	Venue is unavailable → System prompts the organizer to select a different venue.
Status:	Planned
Priority:	High

ID:	UC-08
Title:	Monitor Event Registration (Included use case of UC-06)
Description:	The event organizer monitors the registration process for the event, tracking the number of participants and whether the event has reached its capacity.
Primary Actor:	Event Organizer (Students)
Preconditions:	1. The event must be created. 2. The event registration must be open.
Postconditions:	The organizer can track the registration status in real-time.
Main Success Scenario:	• The event organizer navigates to the "Event Registration" section. • The system displays the number of registered participants. • The organizer can monitor whether the event is at full capacity.
Extensions:	• Event is at full capacity → System notifies the organizer.
Status:	Planned
Priority:	High

ID:	UC-09
Title:	Open Volunteer Sign-up Forms (Extended use case of UC-06)
Description:	The event organizer opens a sign-up form for students to volunteer for the event. The system provides an interface for managing volunteer registration.
Primary Actor:	Event Organizer (Students)
Preconditions:	1. The event must be created and active. 2. The event organizer must have permission to manage volunteer sign-ups.
Postconditions:	The volunteer sign-up form is live and available for students to register as volunteers.
Main Success Scenario:	• The event organizer selects the "Open Volunteer Sign-Up Form" option. • The system displays a form for setting volunteer roles. • The organizer confirms the form and opens it to students for sign-up.
Includes:	Approve and Manage Volunteers (UC-11)
Status:	Planned
Priority:	Medium

ID:	UC-10
Title:	Edit Event Details (Included use case of UC-06)
Description:	The event organizer edits the details of an existing event, such as updating event prices, description, or other information.
Primary Actor:	Event Organizer (Student)
Preconditions:	1. The event must already be created. 2. The event organizer must have permission to edit the event details.
Postconditions:	The event details are updated in the system.
Main Success Scenario:	• The event organizer logs into the system. • The organizer navigates to the "Edit Event Details" section. • The organizer makes changes to the event details (e.g., price, description). • The system saves the updated details.
Includes:	Set Event Prices/Free
Extends:	Delete Event (UC-11)
Status:	Planned
Priority:	Medium

ID:	UC-11
Title:	Delete Event (Extended use case of UC-10)
Description:	The event organizer deletes an event from the system. This action removes the event and all associated details.
Primary Actor:	Event Organizer (Student)
Preconditions:	3. The event must already be created. 4. The event organizer must have permission to delete the event.
Postconditions:	The event is permanently deleted from the system.
Main Success Scenario:	• The event organizer logs into the system. • The organizer selects the "Delete Event" option. • The system prompts the organizer for confirmation. • The organizer confirms deletion. • The system deletes the event.
Extensions:	Organizer cancels deletion → Event is not deleted.
Status:	Planned
Priority:	Medium
